For a mere \$1,5 you can check if the phone is original. Enter your IMEI data at www.IMEIdata.net. The info you get will state:

- IMEI code
- Serial Number
- Product code
- Division
- Manufacturer
- Sold to
- Carrier
- Production date
- Ship date
- Phone age
- Factory Warranty Coverage

In relation to manufacturer, know that Samsung has factories in both South Korea and Vietnam.

Spot your original Samsung Galaxy S6

Below a series of hidden codes (does however not work on all phones):

Secret Hidden Codes for the Samsung Galaxy S6

While the above video shows you how quick and smooth the original Samsung Galaxy S6 runs as compared to the fake one, there are also some secret hidden codes for different diagnostic tests. We have listed them down and you can watch the below video with these codes being applied. Make Sure to backup your device and do some further R&D before running some commands to prevent your phone from any damage. It is also important to note that some of these tests work on some particular Service Provider's model and not on the rest.
